Dental Cleaning

Increase the Health & Longevity of your Pet!

Studies have shown that yearly teeth cleaning can add three or more years of comfortable companionship to your pet's life. Almost all pets over 3 years of age have some form of dental disease. Even a small amount of tartar buildup can cause gum and tooth infections, bad breath and oral pain, and place additional demands on the heart, kidneys and liver.

**10% Savings on Dental Cleaning
now through March 31, 2017.**

Discount applies to pre-anesthetic lab work, ultrasonic cleaning, polishing, extractions and the half day stay at our clinic.
